

## **SUBSEA UMBILICAL TERMINATION ASSEMBLY**

### **ABSTRACT**

A subsea umbilical termination assembly comprising: an umbilical termination head 2 fixed to the end of a subsea umbilical 3; and an electrical and/or optical distribution unit 4 comprising a base frame 5 and several connectors 6 mounted to the base frame 5, wherein each connector 6 is electrically connected to an electrical cable of the subsea umbilical 3 via the umbilical termination head 2 or optically connected to an optical cable of the subsea umbilical 3 via the umbilical termination head 2. The umbilical termination head 2 is mounted in a space 7 provided inside the base frame 5 of the distribution unit 4.
