

ABSTRACT

NON-AQUEOUS LIQUID COMPOSITION

A drug-dissolved non-aqueous liquid composition containing a drug, dioleoylphosphatidylcholine, tocopherol and an organic solvent, wherein the blend concentration ratio between the dioleoylphosphatidylcholine and the tocopherol falls within the range of 75/25 to 25/75, the blend concentration of the dioleoylphosphatidylcholine falls within the range of 15 to 85% (w/w), the blend concentration of the tocopherol falls within the range of 15 to 85% (w/w), and the phase of the non-aqueous liquid composition changes into a non-lamellar liquid crystal upon contact with water, a phosphate buffer, a body fluid, a lacrimal fluid or a vitreous fluid.
