

ABSTRACT

In a floating facility 10 such as an FPSO installation in which a riser support structure 14 (14A, 14B) for supporting a riser pipe R is attached to the outside of the shell plate 12, an upper riser-support structure 14A is attached to the shell plate 12 via a mounting-base structure 22A attached to the outside of the shell plate 12. Further, a lower riser-support structure 14B is attached to the shell plate 12 via a mounting-base structure 22B attached to the outside of the shell plate 12.
