

BIOLOGICAL INFORMATION PROCESSING PROGRAM, BIOLOGICAL
INFORMATION PROCESSING DEVICE, BIOLOGICAL INFORMATION
PROCESSING SYSTEM, AND BIOLOGICAL INFORMATION
PROCESSING METHOD

5

ABSTRACT

A biological information processing program
causes a computer to execute a process including
obtaining biological information of a user from a
10 biological information obtainment device, and causing
a display device to display both a waveform
indicating time-series change in the biological
information and information indicating a result of
processing using a predetermined number of pieces of
15 the biological information.
