PARENTERAL FLUID DELIVERY BAG WITH INTEGRAL LINE SET

ABSTRACT

A bag (200) for containing a fluid for parenteral administration has wrapped therearound a line set (210) in fluid communication with a fitment (230) which allows the fluid to flow from the delivery bag (20) to the patient. A second or drainage bag (222) is connected by line set (214) to the fitment (230) to receive fluid from the patient.
