(54) Title: INTEGRATED TOOL TO INSERT PELLET-RELEASING BIOACTIVE COMPOUND(S) IN A REGION TO BE
TREATED OF A SUBJECT IN NEED

Fig. 1

(57) Abstract: The invention concerns a laparoscopic tool (10) comprising: • - a shaft (102) comprising a proximal end and a distal end; • - a tip (100); • - a moving part (101) disposed between the distal end of the shaft and the tip, the moving part being adapted to allow movement of the tip relative to the shaft; wherein the tip comprises a cylindrical part and a tapered part extending from the cylindrical part to an outlet; the cylindrical part being attached to the moving part; the cylindrical part comprising a central channel surrounded by at least two peripheral channels; the central channel and the peripheral channels extending across the cylindrical part of the tip wherein the central channel comprises a pellet (20) together with a foldable retainer in a folded position; the first peripheral channel comprising an opening at the tapered part, the first peripheral
