(54) **Title:** METHOD AND SYSTEM FOR PROCESSING A REQUEST OF A CUSTOMER

(57) **Abstract:** The invention provides a method and system for processing securely an originator request of a customer. This originator request can be sent to at least one first entity. The method for processing the originator request comprises the steps of (a) sending from the customer the originator request to the or each first entity; (b) connecting the or each first entity to a computation entity; (c) adding by the or each first entity, information concerning the originator request; (d) sending at least part of the first modified request to at least the computation entity; (e) deriving a computation-entity result from the at least part of the first-modified request; (f) sending at least part of the computation-entity result to the or each first entity; (g) deriving therefrom a first-entity result and forwarding it at least in part; and (h) deriving therefrom a customer result.
