

ABSTRACT

PROGRAM FOR PROGRAM EDITING

5 A program for program editing (10) for editing a
program described using a symbol on a program editing
screen causes a computer to function as input-gesture-
characteristic-information acquiring unit (11) for
acquiring input gesture characteristic information
10 including coordinate information and a track of the
coordinate input on the program editing screen, and as
processing executing unit (12) for specifying an operation
target and specifying a command applied to the operation
target on the basis of the input gesture characteristic
15 information, executing the command, and for displaying the
result of execution of the command on the program editing
screen.
