(54) Title: METHODS OF TREATING CONDITIONS ASSOCIATED WITH OVERACTIVE BLADDER

(57) Abstract: The present invention is directed to a method of treating a condition associated with an overactive bladder, comprising administering to a female an intravaginal device, comprising: (a) an annular first matrix comprising a pocket and a pocket wall, wherein the pocket wall has a uniform thickness, and wherein the pocket wall encompasses the pocket; and (b) a second matrix comprising an anticholinergic agent located in the pocket.
