

CARGO TANK UNIT AND SHIP

Abstract

A cargo tank unit comprising a cargo tank, a skirt, and a welded section. The cargo tank is of IMO IGC Code Tank Type C. The skirt has the upper end thereof connected to the lower half of the cargo tank, across the perimeter direction. As the skirt extends downwards, the skirt extends towards the outside, in the radial direction, of the cargo tank and is fixed to the hull. The welded section fixes the upper end of the skirt to the cargo tank, across the perimeter direction.
