TITLE OF INVENTION: A COMBINED DUAL-WAVELENGTH LASER LIGHT PROCESSING DEVICE

ABSTRACT OF THE DISCLOSURE

The invention relates to a Combined dual-wavelength laser light processing device, having a Wi-Fi hotspot and translation device, using the oscillating heat dissipation module to improve the heat dissipation performance, and then using the phase change temperature regulating micro airbag to achieve the effect of intelligent temperature adjustment, integrating the traditional Wi-Fi hotspot machine and translation machine, and becoming a compound machine of Wi-Fi hotspot and translation device, it is combined with the smart phone, using the artificial intelligence chip, parallel computing and processing, so that the working efficiency of the Wi-Fi hotspot and translation device is greatly improved, and then has the function of integrating the functions of Wi-Fi hotspot machine, translator machine and smart phone into a Combined dual-wavelength laser light processing device that is easy to carry abroad.
