(54) Title: CATHETOR COVERING DEVICE

FIG. 1

(57) Abstract: This invention relates to a catheter cover. Previously, catheter covers that may protect a catheter from water were not efficiently securable to a human user. Embodiments of the present invention use a tab (50) joined to a sleeve on the catheter cover. A first adhesive strip (52) is joined to the tab and the sleeve and is configured to be attached to skin of a human user.
