(54) Title: METHODS AND SYSTEMS WITH ADDITIVE AI MODELS

FIG. 1

(57) Abstract: Systems and methods are described for obtaining an additive AI result from a digital file, the method including: processing the digital file by at least one first artificial intelligence (AI) classifier and at least one second AI classifier thereby obtaining a first evaluation result and at least one second evaluation result respectively; directing the first evaluation result and the at least one second evaluation result to at least one synthesis processor; and comparing the first evaluation result and the at least one second evaluation result to at least one dataset cluster thereby obtaining the additive AI result.
