Abstract

"System and Method to Facilitate Online Funds Transfer to a Mobile Phone Subscriber"

A server, system and method for facilitating online funds transfer to a mobile phone subscriber is disclosed. A payor is able to make payments to a mobile phone subscriber by supplying the payee's mobile phone number. The payment is sent via an online currency exchange provider to the email address <mobile_number>@domain.com; and a telecommunications network is utilised to allow access to the email account; therefore allowing payment(s) thereto.
