(54) Title: HAT WITH STORAGE POCKET

(57) Abstract

A hat (10) has a storage pocket (22) on the inside of the hat which is located entirely within a dead space (30) at the front portion of the hat extending from a location spaced above a hat band (28) towards the crown of the hat (10). When a hat (10) is worn, there will be a dead space (30) inside the hat (10) where the hat does not contact the wearer's head, which typically extends from a location just above the hat band (28) to the crown of the hat (10), due to the difference in curvature between the wearer's head and the hat (10) itself. By positioning a storage pocket (22) in this area, unsightly bulges are avoided, as well as discomfort due to stored items pressing against the wearer's head.
