(54) Title: BINDING MOLECULES THAT INHIBIT CANCER GROWTH

(57) Abstract: The invention provides means and methods for inhibiting growth of a cancer. The means in some embodiments comprise proteins and antibodies that binds an extracellular part of a membrane associated member of the epidermal growth factor (EGF) receptor family and an extracellular part of a membrane associated member of a WNT signaling pathway. Further provided are various cells and assays that are helpful in the production of the proteins, antibodies and cells.
