(54) Title: APPARATUS FOR PRODUCING ELECTRICITY FROM A MOVING FLUID AND METHOD

Fig. 1

(57) Abstract: Apparatus for producing electricity from a moving fluid comprising: - an elongated body having a longitudinal axis, the elongated body being arranged to be attached to the ground or seabed and exposed to the moving fluid; - at least one tensioned cable, which is supported in tension from the elongated body, and which is arranged to oscillate or vibrate upon oscillation of the elongated body; and - at least one energy harvester for converting kinetic energy of the at least one oscillating or vibrating tensioned cable to electric energy.
