

FLASH PHOTOGRAPHY APPARATUS AND METHOD OF MANUFACTURING THEREOF

ABSTRACT

The present disclosure relates generally to a flash photography apparatus and a method of
5 manufacturing thereof. More particularly, embodiments of the present disclosure are directed
an apparatus including a plurality of lens provided over a plurality of light sources provided
circumferentially about a camera aperture of an image capture device. Methods of
manufacturing are also described in the present disclosure as to the provision of a lens
assembly for such flash photography apparatus.
