

Fig. 1

Fig. 2

- (A) Relationship between the lipid content of the whey protein-containing starting material and the flavor
(Protease M)

- (B) Relationship between the lipid content of the whey protein-containing starting material and the flavor
(Protease P)

Fig. 3

- (A) Relationship between the lactose content of the whey protein-containing starting material and time-dependent discoloration (Protease M)

- (B) Relationship between the lactose content of the whey protein-containing starting material and time-dependent discoloration (Protease P)
