

ADDITIVE FOR RESIN, ADDITIVE-CONTAINING RESIN, AND METHOD
FOR PRODUCING THE SAME
Abstract of the disclosure

To provide a plastic material suitable for
preservation of the environment and a method for
5 producing the same by adding organic or inorganic sludge
to a resin derived from waste plastics to form a flame-
retarded resin, an antistatic resin, or a biodegradable
resin so that the electrical and physical properties of
the resin are improved and sludge and waste plastics are
10 effectively utilized.
