(54) Title: SYSTEM AND METHOD FOR REMOTELY ATTENDED DELIVERY

(57) Abstract: A method and system for remotely monitoring deliveries, the method and system include detecting an arrival of a delivery at an access point and notifying a monitoring center of the arrival of the delivery at the access point. The method and system include verifying at least one verification detail, which correlates to the delivery, and sending a configuration signal from the monitoring center to the access point, which has instructions for controlling an entrance at the access point. The method and system can further include sending a second configuration signal from the monitoring center to the access point, which has instructions for controlling an entrance at the access point upon completion of the delivery. The method and system can further include sending an indication signal from the monitoring center to the access point, which has instructions for controlling an indicator at the access point.

**Declaration under Rule 4.17:**

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

**Published:**

- *without international search report and to be republished upon receipt of that report*
