ABSTRACT

A method for producing an iron-rich yeast extract, which involves an extraction step of suspending iron-containing yeast in a solution containing a carboxylic acid and/or a carboxylate and then separating the resultant suspension into a solid component and a liquid component; an iron-rich yeast extract; and food.

ABSTRACT

A method for producing an iron-rich yeast extract, which involves an extraction step of suspending iron-containing yeast in a solution containing a carboxylic acid and/or a carboxylate and then separating the resultant suspension into a solid component and a liquid component; an iron-rich yeast extract; and food.
