(54) Title: DEBRIS COLLECTION DEVICE AND METHOD

(57) Abstract: A collection device for use with a drill to capture debris ejected from drilling into a surface (100) comprising a body (10) formed of flexible material having a first, substantially flat, configuration and a second erect, configuration defining a cavity (120). The body includes a hole (50) for receiving a drill bit into the cavity when the body is erect and adhesive means (80) for adhering the body to the surface (100).
