Abstract

Presentation Device

A presentation device (1) with a base (5), with bars (3) capable of being plugged together or plugged together for a flexible stand (2), the stand being connectable or connected to the base (5) via a plug connection, and with transverse bars (9, 10) as a holding means for a placard, film or the like presentation carrier (6) for connecting the latter to the base (5) and the stand (2); for a quick and easy set-up or dismantling, the base (5) is designed with four elongate foldable feet (14 to 17) which are articulated on an elongate crossmember (11) and are capable of being pivoted out of a folded-up position of rest parallel to the crossmember (11) into an operating position at least essentially at right angles to the crossmember (11) and back again.
