(54) Title: A DEVICE

(57) Abstract: This invention relates to a device for retracting a firing pin of a rope system cable spiking tool and a method of using the device. The device comprises: an adapter having an aperture for receiving a breech block of the rope system cable spiking tool; a safety latch extending from a top side of the adapter adaptable to block and unblock a path of a striking latch of the rope system cable spiking tool; a firing pin puller having a retainer adaptable to grip one end of a firing pin of the cable spiking tool; one or more remotes configured to selectively transmit a first signal pattern and a second signal pattern where each signal pattern is unique and different from the other; a receiver configured to trigger the safety latch to unblock the path of the striking latch upon receiving the first signal pattern and subsequently trigger the firing pin puller to pull the firing pin away from the cable spiking tool upon receiving the second signal pattern.
