DISPOSABLE DIAPER HAVING MECHANICAL FASTENER

A disposable diaper according to the present invention includes mechanical tape fasteners, and the tape fasteners (18) extend outwards from transversely opposite side edges (15) of a disposable diaper (1) and are provided on their front surfaces with hook members (22). Each of the hook members (22) have their front surfaces partially coated with adhesive (25) by means of which the hook members (22) are peelably bonded to release zones formed of material such as a plastic sheet in the proximity of the side edges (15) of the diaper.

Refer to Fig. 1.
