

ABSTRACT

ELECTRONIC CAM-TYPE CAN SEAMER

Crimping unit (1) comprising:

- a first plate (10);
- a first lever (50) equipped with a winding wheel (54);
- a second lever (60) equipped with a crushing wheel (64);
- a winding actuator connected to the first lever (50);
- a crushing actuator connected to the second lever (60);

wherein the winding actuator and the crushing actuator are governed by an electronic control unit (7) to vary the distance between the winding wheel (54) and/or the crushing wheel (65) of the first axis according to the angular position of the first plate (10) around the first axis.
