(54) Title: DEVICE, SYSTEM, AND METHOD FOR DISINFECTING AN AREA

Figure 1d

(57) Abstract: The disclosure relates to a disinfection device comprising a housing for receiving a plurality of light emitting diode (LED) units capable of emitting a radiation for disinfection, the housing having an internal surface coated with a light reflective material, the internal surface arranged to reflect radiation emitted from each of the LED units; wherein each of the plurality of LED units comprises a corresponding lens unit arranged to focus or collimate radiation emitted by the at least one of the plurality of LED units.
