

DUAL-ACTING ANTIHYPERTENSIVE AGENTS

Abstract

5 The invention is directed to compounds having the formula: (I) wherein: Ar, r,
Y, Z, Q, W, X, and R⁵⁻⁷ are as defined in the specification, and
pharmaceutically acceptable salts thereof. These compounds have AT₁ receptor
antagonist activity and neprilysin inhibition activity. The invention is also
directed to pharmaceutical compositions comprising such compounds; methods
10 of using such compounds; and process and intermediates for preparing such
compounds.
