ABSTRACT

METHOD OF GRANTING DRM LICENSE TO SUPPORT PLURAL DEVICES BACKGROUND OF THE INVENTION

A method is provided for granting a digital rights management license between a server and a plurality of devices. Content is transmitted from the server to at least one of the plurality of devices, wherein the content contains license information that includes identifiers for at least two of the plurality of devices capable of reproducing the content respectively. The identifiers included in the license information are extracted from the received content, and if the extracted identifier corresponds to an own identifier of the device, the content is reproduced by the device.
