

MAINTENANCE MANAGEMENT SYSTEM, MAINTENANCE ASSIST
APPARATUS, MAINTENANCE MANAGEMENT METHOD, AND
MAINTENANCE MANAGEMENT PROGRAM

ABSTRACT

5

An image registration unit (310) of a maintenance assist apparatus (300) registers in cleaning service information where usage status of a cleaning service on an air conditioning machine is set, a filter image obtained by a maintenance person photographing a filter of the air conditioning machine. A registration confirmation
10 unit (320) determines whether or not the filter image has been registered in the cleaning service information, when a completion report which reports completion of the cleaning service is received from the maintenance person, outputs to a maintenance terminal apparatus, a completion confirmation notification which notifies that the completion of the cleaning service has been confirmed, when it is determined that the filter image has
15 been registered, and outputs to the maintenance terminal apparatus, a registration warning notification which prompts registration of the filter image, when it is determined that the filter image has not been registered.
