(54) Title: SALES SYSTEM AND METHOD FOR PRESCRIPTION PRODUCTS

(57) Abstract: The present invention relates to a system for ordering at least one prescribed product comprising; an authorized reseller system comprising an authorized reseller registration system wherein at least one prescription is entered; a consumer system comprising a consumer registration system and a prescribed product order placement system; and a prescription management system comprising a prescription verification function which performs at least one calculation on the entered prescription to generate a calculated approved prescription which includes a maximum purchase amount of prescribed product that may be purchased under the calculated approved prescription and an actual wear schedule wherein said authorized reseller system, said consumer system and said prescription management system are communicatively linked so that the consumer may order prescribed products directly from a manufacturer of prescribed product so long as the amount of prescribed products ordered does not exceed the maximum purchase amount or the actual wear schedule.
