(54) Title: EMERGENCY CALL COMPLETION FOR VOIP BASED ON LOCATION OF CALL ORIGINATOR

(57) Abstract: Emergency calls placed from telecommunication devices connected to a data network are completed to the appropriate public safety answering point (PSAP). In one embodiment of the present invention, a method for completing an emergency call comprises receiving a call from a device on a data network, the call being destined for an emergency service, the device having a known physical location, obtaining a telephone number of an emergency call center that handles emergency calls for the physical location of the device, and routing the call to the emergency call center using the assigned telephone number.
