WHAT IS CLAIMED IS:

1. A dental floss member comprising:

a linear type dental floss having a predetermined length;

a first fixer disposed at one end of the dental floss; and

a second fixer disposed at the other end of the dental floss;

wherein the first fixer is a holding object having a thickness larger than that of the dental floss to be held and fixed into a slot provided in a dental floss holder.

2. The dental floss member of claim 1, wherein the second fixer includes a ratchet engaged with a corresponding ratchet of the dental floss holder.

3. The dental floss member of claim 1, wherein the second fixer in an annular shape is formed at the other end of the dental floss and is hung and fixed onto a hook provided on the dental floss holder.

4. The dental floss member of claim 1, wherein the second fixer is formed in an arrowhead shape and is held and fixed into a fixing groove provided in the dental floss holder.

5. A dental floss holder for mounting a dental floss member that includes a linear type dental floss having a predetermined length, a first fixer disposed at one end of the dental floss the first fixer is a holding object having a thickness larger than that of the dental floss to be held and fixed into a slot provided in the dental floss

holder, and a second fixer disposed at the other end of the dental floss, the dental floss holder comprising:

a body having a first corresponding fixer to which the first fixer is fixed and a mounting part on which a section for use of the dental floss is mounted; and

a second corresponding fixer disposed at the body and to which the second fixer is fixed.

6. The dental floss holder of claim 6, wherein the first corresponding fixer includes the slot in which the first fixer in the form of the holding object is held and fixed.

7. The dental floss holder of claim 6, wherein the second corresponding fixer is a corresponding ratchet engaged with a ratchet of the second fixer and whose movement toward the mounting part is limited while whose movement away from the mounting part is permitted.

8. The dental floss holder of claim 6, wherein the second corresponding fixer is a hook on which the second fixer in an annular shape provided at the other end of the dental floss is hung and fixed.

9. The dental floss holder of claim 6, wherein the second corresponding fixer is a fixing groove into which the second fixer in an arrowhead shape is inserted.
