(54) **Title:** METHOD AND SYSTEM FOR DETERMINING A DRIVER FOR A REQUEST

Fig. 5

(57) **Abstract:** The present disclosure provides methods and systems for determining a driver for a request. In some examples, there is provided a method comprising: determining, by a processor, a second location that is within proximity from a first location based on a search that starts from a road that is nearest to the first location, the first location being indicated in a request for a driver; and determining, by the processor, a driver for the request based on whether the driver is on the way to the second location.
