(54) Title: SYSTEM AND METHOD FOR THIRD PARTY MANAGEMENT OF PRODUCT MANUFACTURE ORDERING BY A SUB-END-USER BASED UPON APPROVED PRODUCTS OF END-USER

(57) Abstract: A system and method permit an end-user to effectively communicate its approved product information or product specifications to its sub-end-users for managing any program that it wishes to communicate and support with its sub-end-users. It is specifically contemplated that a third party can effectively manage the system and method, which is advantageous in that the interested third party can also market its services, materials or other products to the sub-end-users while facilitating the end-users need to communicate its program or approved information to its sub-end-users. Information may also be managed to/from other interested third parties, such as material suppliers or product manufacturers or material convertors. Such a system and method may also advantageously accommodate input or additional information from other parties like designers, consultants, and the like for the benefit of the end user and/or its sub-end-users.
