(54) Title: LEG FOLDING MECHANISM AND A PUSH CHAIR

Fig 13b

(57) Abstract: There is provided a leg folding mechanism, such as a leg folding mechanism for a push chair, the leg folding mechanism comprising a core member having a longitudinal axis and, preferably, first and second axially spaced core guides; a first leg member rotatably mounted on the core member, preferably at the first core guide; a second leg member rotatably mounted on the core member, preferably at the second core guide; a shuttle disposed within the core member and moveable within the core member to cause movement of the legs as the shuttle moves within the core.
