(54) Title: OVEN HAVING A UNIFORM HOT AIR FLOW IN THE PREPARATION SPACE

(57) Abstract: An oven for use in an aircraft, comprising a preparation space (3). A fan (11) and a heater are located behind a separating wall (9). The separating wall (9) has at least one of the following means for enhancing the uniformity of air flow: - a throat (17) around a central air intake opening in the separating wall (9) - the separating wall provided with end edges (18) which run close to the side walls (4) of the preparation space and which are curved or bent towards the preparation space - flow guides (19,20) extending along an edge of the separating wall (9) and directed away from the preparation space.
