(54) Title: COUNTERFLOW EVAPORATOR FOR REFRIGERANTS

(57) Abstract

A counterflow evaporator (45) for refrigerants, in particular for zeotropic refrigerants, where elongated inner members (10) are inserted in the elongated tubular members (30) of the evaporator (45) to form an annular passage (29) through which the refrigerant can flow. Resilient support members (12) maintain the elongated inner members (10) in position within the elongated tubular members (30).
