(54) Title: IDENTIFICATION TAGS, OBJECTS ADAPTED TO BE IDENTIFIED, AND RELATED METHODS, DEVICES AND SYSTEMS

(57) Abstract: An identification tag for identifying an object to which the identification tag may be attached or in which the tag may be embedded, as well as to objects that are adapted to be identified. The invention also relates to reading devices for reading identification features that are located in an identification tag. The tags and objects may consist of an engagement track or accommodating recess wherein the engagement track or accommodating recess is designed such that it allows reading of identification features comprised in the tag or object and wherein the engagement track or accommodating recess is designed such that it is essentially complementary in shape to an engagement element of a reading device, wherein the engagement element comprises a reading element adapted for reading the identification features located in the identification tag or object. The identification tag may also comprise an accommodating layer which comprises an accommodating recess.
