(54) Title: LOCKER MANAGEMENT TECHNIQUES

FIG. 1

(57) Abstract: A locker system includes a locker area, a plurality of lockers positioned in the locker area, and a plurality of augmented reality headsets. Individual augmented headsets of the plurality of augmented reality headsets including a display and being configured to be worn by respective individual users. The locker system also includes a controller communicatively coupled to the plurality of lockers and the plurality of augmented reality headsets, wherein the controller comprises a memory and a processor configured to execute instructions stored on the memory. The instructions include generating locker assignments to assign individual lockers of the plurality of lockers to the respective individual users, communicating the locker assignments of the assigned individual lockers to the respective individual users using the plurality of augmented reality headsets, and controlling operation of the assigned individual lockers of the plurality of lockers based on signals received from the plurality of augmented reality headsets.
