IMAGING UNIT, INFORMATION PROCESSING DEVICE, PASSAGE MANAGEMENT SYSTEM, INFORMATION PROCESSING METHOD, AND PROGRAM

ABSTRACT

One example of an imaging unit according to the present disclosure includes a camera provided in a gate having a door that opens and closes based on a result of authentication of a face image of an entering user and a guide member provided with the door, the camera capturing the face image, a housing attached to the guide member and housing the camera; and a light-emitting member located at at least a part around the camera and capable of emitting light according to a state of the authentication.
