HIGH THROUGHPUT SCREENING METHOD, ARRAY ASSEMBLY AND SYSTEM

ABSTRACT OF THE DISCLOSURE

A liquid chemical stripping or cleaning solution is selected by combinatorial high throughput screening. A high throughput screening well array assembly (10) includes (A) a metal substrate and (B) a mask (16) that defines an array of wells on the substrate. A combinatorial high throughput screening system includes (A) a metal substrate and (B) a mask (16) that defines an array of wells on the substrate and a reaction vessel to receive the well array assembly (10).
