(54) Title: INTERCHANGEABLE DRILLABLE TOOL

(57) Abstract: A downhole tool for use in a well has a mandrel (32) with an expandable sealing element (102) disposed thereabout. The mandrel has a head portion (62) threadedly connected thereto. A shoulder in the head portion and an upper end of the mandrel define an annular space (80). A sleeve with a bore therethrough may be positioned in the annular space. The head portion may be removed and a solid plug installed so that it fits within the annular space and so that the downhole tool will act as a bridge plug. The downhole tool has slip rings (92, 96) made up of a plurality of individual slip segments (114) that are adhesively bonded to one another at the sides thereof.
