

ABSTRACT**GLUTARIMIDE DERIVATIVES, USE THEREOF, PHARMACEUTICAL
COMPOSITION BASED THEREON AND METHODS FOR PRODUCING GLUTARIMIDE
DERIVATIVES**

The present invention relates to novel biologically active glutarimide derivatives of general formula I or pharmaceutically acceptable salts thereof, their use as an agent for the treatment of upper respiratory tract diseases, pharmaceutical compositions comprising the glutarimide derivatives of general formula I, methods for preparing the glutarimide derivatives of general formula I by heating a dicarboxylic acid monoamide of general formula II with a dehydrating agent.
