

Antibodies Comprising An Ion Concentration Dependent Antigen-Binding Domain, Fc Region
Variants, Il-8-Binding Antibodies, And Uses Therof

[ABSTRACT]

5 One nonexclusive aspect provides molecules further improved from antibodies that
can bind to antigens in an ion concentration-dependent manner. An alternative nonexclusive
aspect provides safe and more advantageous Fc region variants that have decreased binding to
pre-existing ADA. An alternative nonexclusive aspect provides novel IL-8 antibodies that are
superior as pharmaceuticals.
