

ABSTRACT

The present invention, belongs to the technical field of Internet, discloses a method and an apparatus for generating lyrics, a method and an apparatus for displaying lyrics, an electronic device, and a storage medium. The method comprises: acquiring lyrics of a target song and an audio file of the target song; determining, according to a character to be annotated among a plurality of characters in the lyrics and audio clips corresponding to the plurality of characters in the audio file, a candidate pronunciation of the character to be annotated; if the character to be annotated has one candidate pronunciation, determining the candidate pronunciation as a corresponding pronunciation of the character to be annotated in the target song; if the character to be annotated has at least two candidate pronunciations, determining a candidate pronunciation semantically matching the character to be annotated as the corresponding pronunciation of the character to be annotated in the target song; and generating a first lyric file of the target song according to the plurality of characters and the corresponding pronunciation of the character to be annotated in the target song. Therefore, in the subsequent display of the lyrics, the pronunciations can be displayed synchronously to ensure that the user can sing each character of the target song correctly.
