(54) Title: OMP26 ANTIGEN FROM HAEMOPHILUS INFLUENZAE

(57) Abstract

A novel antigenic protein derived from the outer membrane of *H.influenzae* is provided. DNA sequences encoding such a protein are also provided as are vaccines comprising the protein and methods of immunising a subject against *H.influenzae* infection. The invention also includes methods for the prophylaxis or treatment of respiratory tract infections or otitis media, as well as methods for the detection of *H.influenzae*, and kits for use in such methods.
