

FREEZER-REFRIGERATOR

ABSTRACT

[Abstract]

[Object] To provide a freezer-refrigerator which is inexpensive and high in
5 heat exchange efficiency.

[Solution] The freezer-refrigerator is provided with a first fin-and-tube type
cooler 13 having a heat transfer pipe 13a and a plurality of planar fins 13b
penetrated by the heat transfer pipe 13a and fixed, and a second fin-and-tube
type cooler 14 having a heat transfer pipe 14a and a plurality of planar fins 14b
10 penetrated by the heat transfer pipe 14a and fixed, in which the second fin-and-
tube type cooler 14 is smaller in size than the first fin-and-tube type cooler 13
and is arranged on the upstream side of the cooler 13 in an air flow.
