(54) Title: MEDICAMENT CARRIER FOR DRY POWDER INHALATOR AND PROCESS FOR FORMING THE SAME

(57) Abstract

A medicament carrier for use in a dry powder inhalator device and a process for forming the same wherein the medicament carrier has at least one carrier screen portion. The carrier screen portion defines a plurality of interstices therein and carries a powdered medicament which may be applied in a suspension and the suspending agent then evaporated off and which is loaded onto the carrier screen portion surface such that the interstices of the carrier screen portion are at least partially open and free of the dry powdered medicament.
